Claim 16. (Amended) The method of processing a light-sensitive material according to claim 14, wherein the lithographic printing plate further comprises a protective layer on the silver halide emulsion layer.

### REMARKS

This Supplemental Amendment is submitted in order to better claim patentable aspects of the present invention. Claims 14 and 16 have been amended as shown above.

In view of the above and the Amendment filed June 24, 2002, it is believed that this application is in condition for allowance and a Notice to that effect is respectfully requested.

Respectfully submitted,

**APPENDIX**

**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

**IN THE CLAIMS:**

Proposed Amendments To Claims 14 and 16 Showing Deletions And Insertions.

Claim 14. (Twice Amended) A method of processing a light-sensitive material according to claim 1, wherein said light sensitive material is [a silver halide emulsion layer, the silver halide emulsion layer being on the support, the support being of anodized aluminum, said method further comprising,] a lithographic printing plate having at least a silver halide emulsion layer on an anodized aluminum support and using a silver complex diffusion transfer process, wherein after coating a developing solution to effect development, bringing the peeling means into close contact with [the silver halide emulsion layer] the lithographic printing plate and peeling at least the silver halide emulsion layer by the peeling means.

Claim 16. (Amended) The method of [making a lithographic printing plate] processing a light-sensitive material according to claim 14, wherein the lithographic printing plate further comprises a protective layer on the silver halide emulsion layer.
